EXPERIENCE

Project Engineer

Academic Project Role

📅 Jan 2023 – Jun 2025

- Developed full-stack applications using Java, Spring Boot, and React for academic and personal projects
- Led backend development across 3+ team-based projects, resulting in 30% faster development cycles
- Applied Agile methodologies in sprint-based environments, enhancing team productivity by 20%
- Conducted code reviews and collaborative debugging, reducing bug resolution time by 40%

PROJECTS

QuickCourt

GitHub

📅 Jan 2025

- Built a full-stack sports facility booking system with Spring Boot (Gradle) backend and React frontend
- Implemented secure user authentication using JWT for role-based access
- Designed booking system with time slots, and review module
- Developed admin dashboard for managing facilities, users, and bookings
- Technologies: Spring Boot, React, MySQL, JWT, Docker

SkillSwap

GitHub

📅 July 2025 – Present

- Developed a full-stack skill exchange platform enabling users to list, request, and swap skills with others
- Implemented skill matching logic and swap request workflows using Spring Boot and MySQL
- Built an intuitive, responsive frontend with React and TypeScript, seamlessly integrated via RESTful APIs
- Technologies: Spring Boot, React, MySQL, REST API, TypeScript

Voice-Based Patient Intake Agent

GitHub

📅 Jun 2025 – July 2025

- Developed AI voice agent to collect patient data through natural multilingual conversations
- Built dynamic conversation flows using LangGraph and integrated ChromaDB for memory management
- Created RESTful backend with Spring Boot and persisted data using MySQL
- Technologies: LangGraph, Spring Boot, MySQL, ChromaDB

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Parul Institute of Technology

📅 June 2022 – Present 📍 Vadodara, Gujarat

CGPA: 8.34/10.0

ACHIEVEMENTS

- Finalist in Odoo Hackathon (out of 19,000+ participants)
- Built an AI-powered, voice-based patient intake system — MyInsite Healthcare Hackathon 2025
- Finalist Vadodara Hackathon 5.0 (Top 45 out of 400+ teams)
- Developed a sign language translation app PU Code Hackathon 2.0
- Solved 400+ DSA problems on LeetCode and Codeforces

TECHNICAL SKILLS

- **Programming Languages:** Java, C++, HTML, CSS, JavaScript
- **Frameworks & Libraries:** Spring Boot, Spring AI, Spring JPA, Spring Security, React
- **Databases & Tools:** MySQL, Firebase, Git, Postman, WebSocket, REST APIs, ChromaDB
- **AI/ML Technologies:** LangChain, Langgraph, Ollama, LSTM, OpenCV, MediaPipe
- **Development Practices:** Agile Development, Test-Driven Development, CI/CD
- **Infrastructure & DevOps:** Docker, Microservices

SOFT SKILLS

- **Communication:** Team Collaboration, Active Listening, Clear Documentation
- **Problem-Solving:** Debugging, Analytical Thinking, Root Cause Analysis
- **Professionalism:** Code Review, Time Management, Continuous Learning
- **Creative Skills:** UI/UX Design, User-Centered Thinking
